

Castledare Miniature Railway Submission to the 2012 ALSSC Consultation Process for the AALS Codes of Practice.

14 May 2012

Good morning Warwick,

A couple of items were raised at our last committee meeting and I advise you of them accordingly:

1. The committee of the Castledare Miniature Railway advise that they fully support the principle of individual clubs issuing Qualification Licenses to members of all AALS clubs as this will alleviate any problems when members are visiting other clubs. It is then simply a matter of the visiting member producing his license [as is the case of boiler certification tickets if visiting with steam locomotives] as verification.
2. The second matter of speedo's in locos, again, CMR feel that these would indeed be a very handy 'tool' to support driver's and avoid the possibility of errors in judgement in relation to speed, particularly on public running days.

Is there any provision for the AALS to make available a source or method of obtaining / constructing such devices. Are you aware if they are a stock item that is available retail?

Any assistance would be appreciated.

Regards,

Ken Belcher
Secretary
Castledare Miniature Railway
